The Department of Communication Sciences and Disorders (CSND) was established at Montclair State University in 1969. The Montclair State University Center for Audiology and Speech-Language Pathology (MSU-CASLP) provides diagnostic evaluation and treatment for adults and children who demonstrate communication difficulties. The Aphasia Research Laboratory investigates all aspects of aphasia, with a particular emphasis on the efficacy of various treatments for the disorder. These data were gathered from participants from the MSU-CASLP, from the Aphasia Research Laboratory, and from surrounding community- and hospital-based clinics and centers.
