The mission of the Snyder Center for Aphasia Life Enhancement (SCALE), a Life Participation Center founded in 2008, is to improve the quality of life for people living with aphasia and their families by:

- Providing individuals with aphasia a place to connect
- Offering interactive group activities designed to support and empower members as they re-engage in community
- Providing educational materials, training and support for family members
- Striving to raise public awareness and understanding of aphasia through community outreach and advocacy projects
