

Palmer
Repository of Swallow Studies

ID	Age (Yr;M)	Sex	Ped/Adult	Medical Dx (if available)	Additional Info (Projections)
001	3;01	M	Ped	History of premature birth (30-weeks), periventricular leukomalacia, spastic paraplegic cerebral palsy, visual impairment, chronic constipation, global developmental delay, and speech delay. Uses a wheelchair.	Lateral projection
002	2;05	M	Ped	22 q. 11.2 duplication, eosinophilic esophagitis, dysphagia, feeding difficulty, failure to thrive, chronic constipation, chronic nasal congestion, hypothyroidism, epilepsy, macrocephaly, agenesis of the corpus callosum, developmental delay and cortical visual impairment.	Lateral projection
003	0;01	F	Ped	s/p left thoracotomy and PDA ligation	Lateral projection
004	0;03	M	Ped	Reflux	Lateral projection
005	0;06	M	Ped	6 month old term infant, FTT, dysphagia with silent aspiration, large perimembranous VSD with planned closure. Hx of heart failure, vascular ring, posterior tongue tie, laryngeal cleft. ENT scope revealed paralyzed L vocal cord. Ileostomy with plan to re-anastomose in 1-2 weeks	Lateral projection
006	0;10	F	Ped	Laryngomalacia, GERD, dysphagia/feeding difficulties and delayed milestones. There was a small VSD noted	Lateral projection
007	0;08	M	Ped	Chronic cough since RSV infection	Lateral projection

008	0;04	F	Ped	Reflux	Lateral projection
009	1; 0	M	Ped	Term infant admitted to NICU following delivery with duodenal web and intrauterine drug exposure. ECHO prior to d/c revealed mild stenosis of right SVC and IVC with unobstructed left SVC to coronary sinus, NAS in NICU. Has abnormal ocular movements secondary to intrauterine drug exposure. Absence of heterozygosity in large regions of chromosome 1	Lateral Projection
010	0;09	M	Ped	Prematurity (32 weeks (about 7 and a half months) GA), feeding difficulty, GERD, retinopathy of prematurity, pelvic kidney, developmental delay, and hearing difficulty	Lateral projection
011	0;09	M	Ped	PMH: FTT, poor muscle tone, developmental delay	Lateral projection
012	0;08	M	Ped	PDA ligation, pulmonary hemorrhage after birth and placed on JET ventilation, retinopathy of prematurity, g-tube placement, GERD, and hypothyroidism	Lateral projection
013	1;00	UNK	Ped	baby of twin gestation, GERD, inguinal hernia s/p repair, CLD, ASD, premature 28-week born	Lateral projection
014	1;01	M	Ped	G tube feeds only. Complex medical history including: Coarctation of aorta, congenital hypoplasia of aortic arch, microcephaly, cerebral palsy, paralysis of vocal cords (uncertain on details), GERD.	Lateral projection
015	1;11	M	Ped	Torticollis, Laryngotracheomalacia, and GERD	Lateral projection
016	1;07	F	Ped	Past medical is significant for prematurity (31-weeks GA), dysphagia, GERD, Asthma, and OSA	Lateral projection

017	2; 01	M	Ped	Born at 28 weeks. Requiring a 6 -month NICU stay, NEC s/p ostomy, small bowel resection, anastomosis including revision, congenital atresia of ileum, short bowel syndrome, g-tube placement, abdominal hernia repair, developmental delay, iron deficiency, vitamin B12 deficiency, snoring, recurrent otitis media, and sinusitis.	Lateral projection
018	3;11	F	Ped	Chromosomal anomaly (3p monosomy and trisomy 7q), congenital laryngotracheal bronchomalacia, chronic lung disease, cleft palate unrepaired (repair is scheduled for 5/2020), GERD, Seizure disorder, Hypotonia, developmental delay, abnormal MRI with mild to moderate ventriculomegaly and hypoplasia of the inferior cerebellar vermis in the presence of a Mega cisterna magna	Lateral projection
019	6;0	M	Ped	OSA, seizure disorder/epilepsy, mixed developmental delay, Brugada Syndrome, and autism with sensory disorder	Lateral and AP projection
020	6;04	F	Ped	Precocious pubarche, feeding difficulty, dysphagia, intractable epilepsy, ataxia, visual impairment, cognitive impairment, genetic mutation SCN2A, CVI, developmental delay	Lateral projection
021	10;07	UNK	Ped	No significant medical history however food allergies (almond, hazelnut, fish and tomato).	Lateral and AP projection
022	13;05	UNK	Ped	Trisomy 21, developmental delay and repair of vascular ring, OSA.	Lateral and AP projection

023	0;03	F	Ped	Born at 26 weeks , corrected age 6 months, PMH significant for: GERD, dysphagia, s/p G tube, developmental delay	Lateral projection
025	75	F	Adult	Zenker's Diverticulum (orig dx 13 years prior to VFES)	Lateral projection
026	0;00	F	Ped	Concern for tracheoesophageal fistula PMH is significant for sacral dimple, club foot, transferred from OSH secondary to poor feeding	Lateral projection
028	0; 01	M	Ped	Congenital heart disease, ARF with hypoxia, total anomalous pulmonary venous return, pulmonary hypertension, and chylothorax. Surgical repair was completed. Patient required aggressive resuscitation with need for ECMO. Delayed sternal closure completed.	Lateral Projection
029	27	M	Adult	Head and Neck Cancer	Lateral and AP projections
030	43	M	Adult	Developmental Delay	Lateral and AP projection
031	68	F	Adult	Cerebral Palsy	Lateral and AP projection
032	54	F	Adult	General Medicine / COPD	Lateral and AP projection
033	79	F	Adult	Neuro: Degenerative / PKD	Lateral and AP projection
034	82	M	Adult	Neuro: Degenerative / PKD	Lateral projection
035	76	F	Adult	General Medical, DBM / HTN / GERD	Lateral projection
036	73	M	Adult	Head and Neck Cancer / Lx	Lateral projection
037	77	M	Adult	Neuro: Degenerative / PKD	Lateral and AP projection

038	78	F	Adult	General Medical / DBM	Lateral and AP projection
039	86	F	Adult	Head and Neck Cancer/ Thyroid	Lateral and AP projection
040	46	F	Adult	General Medical / Trach / vent	Lateral and AP projection
041	71	F	Adult	Sjogren's Disease	Lateral projection
042	84	M	Adult	Acute Resp failure with hypoxia	Lateral and AP projection
043	87	M	Adult	Dementia / PKD	Lateral projection
044	87	M	Adult	CVA	Lateral and AP projection
045	42	M	Adult	AVM	Lateral and AP projection
046	0;02	F	Ped	Unremarkable term infant who has struggled with PO feeding since birth, per mother	Lateral projection
047	0;01	F	Ped	Born at 35 weeks. No prenatal care with intrauterine drug exposure and daily alcohol exposure. Echo revealed a moderate ASD.	Lateral projection
048	0;01	F	Ped	Born at 31 weeks (about 7 months) and Maternal UDS was positive for methamphetamines on baby's birth date and infant's urine tox was positive for amphetamines	Lateral projection
049	0;02	F	Ped	Full term. Prior to delivery infant was noted to have prominent cisterna magna with a subsequent normal head ultrasound following delivery. Infant was positive for Covid upon delivery but was asymptomatic per mother. Infant has demonstrated frequent gagging, choking and spitting up since birth	Lateral projection

050	0;02	F	Ped	Problem list: pneumonia, dehydration, abnormal liver enzymes, elevated CRP, leukocytosis, and blood culture growing gram-positive cocci in clusters	Lateral projection
051	0;03	M	Ped	Born at 37 weeks (about 8 and a half months), medical history is significant for GERD, tongue tie (clipped), excessive weight loss, and IDM	Lateral projection
052	0;0;4	F	Ped	Born at 37 6/7 weeks and is currently 38 5/7 weeks. Medical history includes congenital heart disease (perimembranous apical muscular VSD, mild valvular PS, PFO), T7 vertebral abnormality, dysmorphic features, and concern for VACTERL association	Lateral projection
053	94	F	Adult	Reports 3 small strokes, cardiac disease uncertain on specifics, osteoporosis.	Lateral and AP projection
054	74	M	Adult	History of splenectomy s/p MVA, basal cell cancer, benign prostate hyperplasia, Cerebrovascular disease, depression, GERD, kyphosis, Parkinson's disease	Lateral projection
055	63	M	Adult	Patient c hx of esophageal cancer post esophagectomy, DM2, L VF paresis GERD, dysphagia. Injection of R VF Suspicion of paralysis of the left vocal fold. Concern for tracheal esophageal fistula.	Lateral projection
056	74	F	Adult	Lives in group home secondary to paraplegia. HTN, hiatal hernia, and living with intellectual disability. Further history of neurogenic bladder, and PTSD.	Lateral and AP projection
057	70	M	Adult	Not available	Lateral projection

058	21	F	Adult	Not available	Lateral and AP projection
059	79	M	Adult	Not available	Lateral projection
060	61	M	Adult	Current PEG, past hx of trach, diabetes	Lateral and AP projection
061	96	F	Adult	Hypertension, thyroid surgery (not recent)	Lateral an AP projection
062	56	M	Adult	Past CVA, residual aphasia, right-sided weakness, prior alcohol abuse, cirrhosis, seizure disorder, and TBI	Lateral and AP projection
063	62	F	Adult	Past CVA with right sided deficits now admitted with acute pontine stroke with left sided deficits.	Lateral and AP projection
064	82	M	Adult	Right base of tongue SCC, HPV positive, cT3N2M0, locally advanced with XRT, staging not available prostate cancer, past G-tube, dementia,	Lateral projection
065	97	F	Adult	History of hypertension, GI bleed, glaucoma, and diverticulitis. Chronic kidney disease, acute on chronic congestive heart failure	Lateral projection
066	88	M	Adult	Hiatal hernia Patient has a past history of aortic valve replacement, CABG, coronary atherosclerotic disease, colon polyps, GERD, hypertension, hyperlipidemia, peptic stricture of the esophagus, reflux esophagitis, rheumatic valvular disease.	Lateral and AP projection
067	60	F	Adult	Largely unremarkable medical history with the exception of migraines. Offers strong family history family history for OPMD. Patient is set to have a genetic test completed.	Lateral and AP projection

068	66	M	Adult	History of head and neck cancer (tonsillar cancer) s/p radiation and chemotherapy (staging not available) Tracheostomy, trismus and PEG. Shiley 6 DCT cuffless.	Lateral projection
069	79	F	Adult	History of neuropathy and Parkinson's disease	Lateral and AP projection
070	29	F	Adult	Past CVA x2 with residual right-side weakness, HIV, and diabetes. Pt is non ambulatory.	Lateral projection
071	92	F	Adult	HTN, arthritis, HLD, coronary arteriosclerosis, frailty	Lateral projection
072	68	F	Adult	Status post mechanical ventilation secondary to COVID	Lateral and AP projection
073	75	M	Adult	Cardiovascular disease with cardiac surgery, adenocarcinoma of prostate, Parkinson's disease	Lateral projection
074	96	M	Adult	Pt admitted with pneumonia with past hx of CVA. Pt also with longstanding diagnosis of dementia, CAD, CKD, and osteoarthritis	Lateral projection
075	91	M	Adult	Hiatal hernia, esophageal stricture	Lateral projection
076	80	M	Adult	Frailty	Lateral projection
077	39	M	Adult	Patient with history of SCC at left base of tongue, with metastasis to lymph node T3N3, P16 positive. Had induction chemo and then CXRT completed. Additional history of diabetes, GERD, HTN, hyperlipidemia	Lateral and AP projection
078	84	M	Adult	COPD, Miner's lung, glaucoma, HTN, FTT, adenocarcinoma of colon, and obstructive sleep apnea.	Lateral and AP projection

079	88	F	Adult	RA, hypothyroidism, pernicious anemia, cough x6 weeks	Lateral projection
080	87	F	Adult	Hyperlipemia, hypertension, and coronary artery disease, 31 pack years cigarettes, acute on chronic respiratory failure	Lateral and AP projection
081	61	F	Adult	HTN past hospitalization for septic shock 2/2 klebsiella. Had PEA arrest. Perc trach/PEG. Shiley 8 DCT trach. Presents c respiratory failure. Improved c trach change.	Lateral and AP projection
082	73	M	Adult	PD, deep brain stimulator, HLD, hypothyroidism, CAD, HTN, prostate cancer, afib, CKD 3	Lateral and AP projection
086	70	M	Adult	COPD, CHF, active smoking (approximately .5 PPD), developmental delay, GERD, schizoaffective disorder, DM2	Lateral and AP projection
087	67	M	Adult	Head and neck cancer (T2N1Mx), PEG, CKD stage 3, heart failure, chronic respiratory failure, congestive heart failure	Lateral projection
088	31	M	Adult	Shiley 8 DCT trach, EtOH	Lateral and AP projection
089	77	M	Adult	Intubated 2 days, dysphonia, CAD c CABG, AKI, DVT, type 2 DM.	Lateral projection

090	79	F	Adult	NH resident, asthma, thyroidectomy, DM, HTN, HLD, COPD	Lateral and AP projection
091	0;02	M	Ped	Born at 38 weeks; congenital heart disease, ARF with hypoxia, total anomalous pulmonary venous return, pulmonary hypertension, and chylothorax s/p surgical repair. ECMO	Lateral projection
